ABOUT US

Senoco is a Turkish company that manufactures nonwoven fabrics, with a team boasting 20 years of production experience.

Founded in Gaziantep to produce nonwoven products, the company operates with a sustainable future motto and environmentally conscious production practices.

Producing spunlace fabrics with its state-of-the-art production line and expert staff, the company prioritizes quality and holds internationally recognized certifications.

Senoco's priority is to deliver its spunlace fabrics to customers in a high-quality, timely and problem free manner.

Mission:

With our employees who have adopted quality and innovation as principles in our operations, we aim to elevate our level of professionalism to the highest degree; to offer technological, high-quality, environmentally friendly products that fully meet customer needs; and to confidently move towards our strategic growth targets in the sector in which we operate, together with our stakeholders.

Vission:

By prioritizing customer expectations and satisfaction, maintaining after-sales support for our specially designed products, continuously improving our competitiveness, growing healthily and sustainably through sound decisions, and employing a well-trained, innovative, dynamic, and large team committed to quality, we aim to be a leading company in our field by producing high-quality products and to pass on the reliability, loyalty, continuity and respect we have gained through our extensive experience to future generations.

OUR APPROACH TO QUALITY

At SENOCO, in line with our quality policy, production in all departments of our company is carried out according to ISO standards. We test the fabrics we produce, both in jumbo and roll form, according to EDANA standards. Unit weight, thickness, tensile strength, composition, and moisture tests are performed in our laboratory.

In addition, conductivity, hardness, NTU, pH, and free chlorine levels in our process water are checked daily. Beyond all this, our company continuously monitors using an online camera system, online weight and moisture meters, and metal detectors.

Hygiene

As SENOCO, hygiene standards begin to be implemented from the moment we enter the business. Each personnel must pass through the hygiene barrier and then be in the production area.

During production, advanced equipment and systems are used to ensure that personnel do not have direct contact with the product.

PRODUCTION LINE

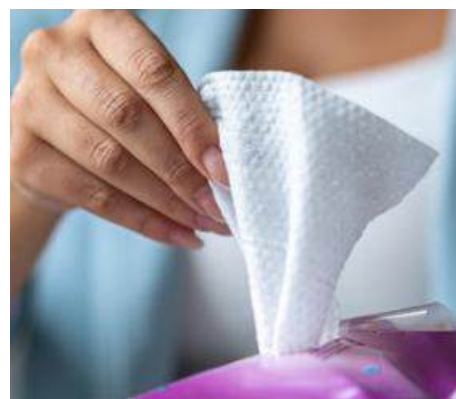

LINE PROPERTIES

Line Width	3.200mm (100mm to 3.200mm)
Basis Weight	33 gsm to 100 gsm
Product Type	Parallel Laid
Pattern	Plain, Embossed, Apertured

- Baby Wipes
- Wet Towels and Refreshing Wipes
- Personal Care and Cosmetic Product
- Salon and Spa Towels
- Medical and Hygienic Applications

CERTIFICATE

A low-angle photograph of a modern, multi-story building with a white, horizontally-ribbed facade. The building is set against a dramatic sky at sunset, with clouds in shades of orange, pink, and blue. The top of the building features a curved roof with a blue and green striped pattern. The company logo, "senovo nonwoven", is prominently displayed on the upper part of the facade. The "senovo" part of the logo is in a stylized, lowercase font with a blue-to-green gradient, and the "nonwoven" part is in a smaller, black, lowercase font. The building's entrance area at the bottom is dark, with large glass windows reflecting the sky. The overall composition is dynamic, with the building's lines leading the eye upwards towards the sky.
